

CAMA MAXI FLEX

CAMA MAXI FLEX

CAMA MAXI FLEX offers particularly stable feed-throughs for large cable diameters of 33 - 70 mm. The highly stable, separable aluminium frame together with the tailor-made grommets ensures perfect strain relief and long-term vibration stability. On request CAMA delivers the parts directly to the place of use. Just in time!

Highlights:

- Customer-specific cable entry
- Divided system / for cable with plug
- Clamping range up to 3 mm
- Pressure-resistant EPDM grommet
- Stable aluminium frame, stainless steel on request
- Integrated strain relief
- IP 54
- Obtaining the warranty of pre-terminated cables due to uninterrupted cable routing
- Easy to assembly
- Excellent vibration damping
- Installation height 40 mm
- Seal included in delivery

Spezifikation:

Material:	EPDM / ALU
Fire class:	EPDM UL 94-V0, self-extinguishing
Protection class:	IP 54
Temperature range:	-40°C to +130°C (static)
Height:	40 mm
Product features:	Halogen and silicone free
